

# got Maze?

*Without Maze, things could udderly start to fall apart. Nail it **ONCE**. Nail it **RIGHT**®... with Maze Nails – the **RECOMMENDED** nails for the new treated lumber!*

- Makers of ACQ and CA treated lumber recommend hot-dipped galvanized and/or stainless steel fasteners!
- Maze has true double hot-dipped galvanized and stainless steel fasteners! (Maze Stainless Steel Type 304 & 316 Nails provide the maximum corrosion-protection in treated wood.)
- Maze **STORMGUARD**® Nails meet & exceed the ASTM-A153 Spec.
- Warning: None of the other types of coatings on the market has the 87 year Maze track record of dependable corrosion-resistance.
- “Hot-galv” IS NOT the same as true hot-dipped galvanized.

INSIST ON GENUINE **STORMGUARD**®  
DOUBLE HOT-DIPPED GALVANIZED  
MAZE NAILS!

*Look for the nails in the  
bright yellow and red boxes! ->*
