

Don't MONKEY around with the wrong nails for

the New  
Pressure  
Treated  
Lumber!

Don't let your treated wood projects be ruined by using the wrong fasteners!

Here are the facts:

- The manufacturers of ACQ and CA *recommend* hot-dipped galvanized and stainless steel fasteners!
- "Hot-galv" IS NOT the same as true hot-dipped galvanized.  
(Genuine Maze Hot-dipped galvanized are the only type "galv." fasteners that will hold up to these corrosive treatments.)
- Maze has genuine double hot-dipped galvanized and stainless steel fasteners!

**INSIST ON GENUINE STORMGUARD  
DOUBLE HOT-DIPPED GALVANIZED MAZE NAILS!**
